GM5

A GAME CHANGER FOR YOUR EVENTS

The GM5 stage deck ensures ease of handling. With a self-weight of only 28 kg for a standard 2x1-meter deck, it weighs 7 kg less than the Prolyte BasicLine deck and 10 kg less than the TopLine deck

It is additionally equipped with a built-in pocket for a secure grip, enabling effortless transportation. The surface features a non-slip hexagon layer that guarantees safety in various environments.

The GM5 deck boasts an impressive load capacity of 500 kg/m² considering its light weight. The universal leg pocket accommodates both square and round leg types.

With a total deck thickness of only 5 cm, it stands out as one of the lowest profiles available on the market, optimising storage space and enhancing moveability for your company and crew.

GM5

Advantages

- Features an ultra-slim design, offering one of the thinnest decks on the market with a total thickness of just 5 cm.
- Weighing only 28 kg, Prolyte's lightest deck offers exceptional portability.
- Combining its lightweight design with an impressive load capacity, the GM5 deck can carry up to 500 kg/m².
- Enhanced stiffness which ensures the deck remains stable.
- Leg pockets compatible with all standard Prolyte StageDex legs.

5 reasons why you need it
